Workshop II - Information Transformation & Security

NB-IoT - Next Generation Security in the Digital Enterprise

Alexei Proskura, Program Director, Security, IDC CEE
Heinz Steiner, Client Executive, HUAWEI
Christoph Grill, Network Security Specialist, ABAX

The focus on security topics is of essential importance in IoT related projects. In this workshop, we will first look at the overall market and then at reference cases as well as give an overview of our experience from IoT projects and application scenarios. Including the feedback of the participants, the workshop will give a general understanding of specific security-related topics and act as a starting point to build individual scenarios.
